ARCHIVES DE L'ACADÉMIE INTERNATIONALE D'ASTRONAUTIQUE

ARCHIV DER INTERNATIONALEN ASTRONAUTISCHEN AKADEMIE

АРХИВНЫЙ ЖУРНАЛ МЕЖДУНАРОДНОЙ АКАДЕМИИ ПО АСТРОНАВТИКЕ

PUBLISHED BY PERGAMON PRESS / NEW YORK · OXFORD

LIST OF CONTENTS

No. 1 FEBRUARY, 1973

Magnetic Intake Limitations on Interstellar Ramjets.....Anthony R. Martin 1

Liquid Film Cooling on Hypersonic Slender Bodies.....Robert J. Cresci and John Starkenberg 11

Liapunov Stability Analysis and Attitude Response of a Passively Stabilized Space System.....R. C. Flanagan and R. Rangarajan 21

On Axisymmetric and Two-dimensional Flow with Attached Shock Waves.....W. H. Hui 35

Solving Flight-Path Optimization Problems on a Minicomputer.....Frederick Y. Thomasson and Gerald Cook 45

Attitude Stability of Two Elastically Coupled Spinning Bodies .....Gary M. Connell 53

Energy Balance in Fusion Rockets... Conley Powell, Ottfried J. Hahn and J. Rand McNally, Jr. 59

Turbulent Viscosity in Axisymmetric Compressible Flows .....Ram Sinha and Victor Zakkay 71

Ex Mundo Astronautico

International Academy of Astronautics Report for the Year 1971–1972..... 79

No 2 APRIL, 1973

Missile Shapes of Minimum Ballistic Factor.....V. B. Tawakley and S. C. Jain 87

Pressure Distribution and Velocity Profiles in Supersonic Laminar Wakes .....M. Holt and J. C. S. Meng 91

Turbulent Supersonic Boundary Layer Flow in the Neighbourhood of a 90° Corner .....R. D. Small and R. H. Page 99

The Solar Radiation Pressure on the Mariner 9 Mars Orbiter..... R. M. Georgevic 109

The Radiative Properties of High Density Argon Plasma in Explosively Driven Shock Waves ...R. T. Bailey, J. T. A. Burton and J. A. Hicks 117

Sur Les Mouvements Stationnaires du Problème Generalise Des Trois Corps ..... Madeleine Pascal 127

Ex Mundo Astronautico

XXIVth International Astronautical Congress, Baku, U.S.S.R., 8–13 October 1973: Programme Announcement..... 139

XXIVème Congres International D'Astronautique, Bakou, U.S.R.S., 8–13 octobre 1973: Annonce du Programme 145

XVIth Meeting of COSPAR and Specialized Symposia... 151

I.A.F. Membership List 1972–1973 153

No. 3 JUNE, 1973

Annual Chronology of International Astronautical Events 1970.....Edited by R. Cargill Hall 155

Normal and Tangential Momentum Accommodation for Earth Satellite Conditions..... Earl D. Knechtel and William C. Pitts 171

The Path Independence of Orbit Inclination Momentum..... John F. Nichols 185

Vol. 18 1973

Free Convection and Thermal Explosion Reactive Systems A. G. Merzhanov and E. A. Shtessel 191

Dynamics of Alouette ISIS Satellites.....F. R. Vigneron 201

Fuel-Optimal Angular Momentum Vector Control for Spinning and Dual-Spin Spacecraft.....
..... Victor Larson and Peter Likins 215

Remote Sensing of Chlorophyll and Temperature in Marine and Fresh Waters.....
..... John C. Arvesen, John P. Millard and Ellen C. Weaver 229

No. 4 OCTOBER, 1973

Earth—Moon—Earth Trajectories .....E. Hantzsche 241

On a Steady Corrugated Flame Front..... G. I. Sivashinsky 253

Spacecraft Oxygen Recovery System..... P. D. Quattrone 261

Effects of Inclination and Eccentricity on Optimal Trajectories between Earth and Venus .....
.....Jean-Paul Gravier, Christian Marchal and Robert Dudley Culp 273

Effect of the Sun, the Moon and Solar Radiation Pressure on a Near-Equatorial Synchronous Satellite ..... Chong-Hung Zee 281

No. 5 NOVEMBER, 1973

Upper Atmosphere Density Measurement by the Sputnik III and San Marco Satellites.....
..... Dott. Ing. N. Bellomo 289

Field Emitted Ion Beams from Liquids for Electric Thrustors...C. D. Hendricks and D. S. Swatik 295

Three-Dimensional Motion of a System of two Cable-Connected Satellites in Orbit.....
.....R. B. Singh 301

Unsteady Embedded Newtonian Flow .....Lars E. Ericsson 309

Hybrid-Coordinate Spacecraft Dynamics Using Large-Deformation Modal Coordinates .....
.....P. W. Likins 331

Stagnation Pressure Losses at Abrupt Contractions with Transverse Flow.....
.....W. U. Roessler and E. M. Landsbaum 349

Oxidation of Ethylene in Shock Tube .....
.....M. Suzuki, T. Moriwaki, S. Okazaki, T. Okuda and T. Tanzawa 359

Non-Equilibrium Turbulent Free Jet Mixing of Compressible Reacting Gases .....
..... Roa-Ling Wang 367

Evaporation of Drops and Breakup of Sprays.....T. Paul Torda 383

Application of Zeldovich Heat Feedback Function to Dynamic Burning of Throttleable Fuel Rich Propellant Fuel Generators.....B. B. Stokes III 395

No. 6 DECEMBER, 1973

International Review Meeting on Communication with Extraterrestrial Intelligence, Held During the 23rd International Astronautical Congress of the IAF..... 409

Preface.....Rudolf Pesek 410

Survey of CETI Activities up to Present.....Rudolf Pesek 411

Astronomical Aspects of Interstellar Communication .....Sebastian Von Hoerner 421

State of the Art in the Detection of Intelligent Extraterrestrial Signals.....B. M. Oliver 431

Methods of Deciphering of a Message from Extraterrestrial Intelligences.....B. V. Sukhotin 441

Status of Biological Aspects of the Modern CETI Problem..... L. M. Muchin 451

Remarks Before IAA Symposium on Communication with Extraterrestrial Intelligence at XXIII IAF Congress in Vienna.....C. S. Draper 455

Ex Mundo Astronautico

Annual Chronology of International Astronautical Events 1971 .....R. Cargill Hall 457

Brief Report of the XVIth Meeting of COSPAR..... 471

Information for Contributors

Submission of Manuscripts: Manuscripts should be submitted, along with a covering letter, to the Editor-in-Chief,

Prof. MARTIN SUMMERFIELD, Department of Aerospace and Mechanical Sciences, The James Forrestal Research Center, Princeton University, Princeton, N. J. 08540, U.S.A.,

or to the Technical Editor:

Dr. WOLDEMAR F. VON JASKOWSKY, Department of Aerospace and Mechanical Sciences, The James Forrestal Research Center, Princeton University, Princeton, N. J. 08540, U.S.A.

Papers will be accepted for publication in any of four different languages: English, French, German or Russian.

At the time the manuscript is submitted, written assurance must be given that the paper, or its equivalent, has not been published or submitted for publication elsewhere.

Submit two (2) copies of each manuscript. Manuscripts should be typed double-spaced on one side of the page only, leaving wide margins for use by the Editors in giving instructions to the printer. Footnotes, references, and figure captions should also be double-spaced.

Short manuscripts may qualify for publication as Technical Notes or Technical Comments. These may be devoted to new developments requiring prompt disclosure, or may be comments on previously published papers which contribute interesting or significant information.

Titles and Authors' Names: Paper titles should be brief. Titles considered by the Editors to be overly lengthy will be shortened. Authors' names should be typed immediately below the title, with full names preferred. Authors' affiliations should follow on the next line, and should include the authors' official titles and the complete addresses (including country) of their companies or institutions.

Abstracts: Full-length papers must be accompanied by a comprehensive abstract. The abstract should be about 200–300 words in length and should be a self-sufficient summary of the paper, not merely an introduction to it. Submission of an inadequate abstract may be sufficient cause to delay publication of an otherwise acceptable paper.

Abstracts will appear in three different languages: 1. The language in which the paper is written; 2. English; and 3. either French, German, or Russian, depending on the language in which the paper is written.

Mathematics: Equations may either be hand-written or type-written. Regardless of the form in which equations are written, clarity for the Editor and printer is essential. Greek letters and unusual symbols should always be identified in the margins. If symbols are hand-written, be sure to distinguish between capital and lower-case letters; between the letter "o" and zero, the letter "k" and kappa, the letter "u" and mu, the letter "v" and nu, and the letter "n" and eta; and between the letter "L", the number "1" and the prime sign. Also, be sure to indicate all subscripts and superscripts. Always use the solidus for fractions in the text and for simple fractions in displayed equations.

Notation: Use standard notation for physical quantities wherever possible.

References: References are to be grouped at the end of the manuscript in order of mention, and are to be given as follows:

1. Books: WHITTAKER, E. T., *Analytical Dynamics* 4th Edn, Chap. IV, p. 91. Dover, New York (1937).

2. Journals: PENNER, S. S. and OLFE, D. B., The influence of radiant-energy transfer on propellant burning rates and ablation rates controlled by an intense radiation field, *Astronautica Acta* **11**, 65–78 (1965).

Always give inclusive page numbers in references to journal articles, and a page or chapter number for books. Journal abbreviations will follow *World List of Scientific Periodicals*, 4th Edn. Butterworths, London (1964).

Illustrations: Line drawings must be clear and sharp to make clear engravings. Use black ink on white paper or tracing cloth. Lettering should be large enough to be legible after reduction (at least 1.5 mm high after reduction). Plan figures in advance for reduction to column width (8 cm). Photographs should be glossy prints, and not matte or semi-matte prints. Coloured illustrations can be published only if paid for by the author.

Each illustration must have a caption. Captions should be listed in order on a separate sheet of paper. Write your name and the figure number either in the margin or on the back of each illustration. Each figure should be cited in numerical order in the text.

Tables: Tables should be planned to fit the page width (16.5 cm) or the column width (8 cm) of the Journal. Do not number table footnotes consecutively with text references. Every table must have a caption. Each table should be cited in numerical order in the text.

Author's Alterations: Make sure that your manuscript contains no typographical errors. While limited alterations of the text on proofs are unavoidable, the cost of making extensive alterations in proof as a result of submission of an inaccurate or unclear manuscript will be charged to the author. Likewise, the cost of remaking engravings because the author's original drawings were incorrect or unclear will be charged to the author.

Reprints: Authors of original papers and review articles will receive 50 reprints of their papers free of charge, and may order additional reprints at a nominal price.

Check List: Before submitting your manuscript, check to make sure that:

1. A letter of submittal is attached which includes written assurance that the paper or its equivalent has not been published or submitted for publication elsewhere.
2. Two (2) copies of the typed original manuscript, illustrations, and covering letter are sent.
3. An abstract is included and, if possible, translations of the abstract as well.
4. The package contains the original line drawings of all figures, and glossy prints of all photographs, preferably not larger than 22 × 30 cm.
5. A list of figure captions, typed on a separate sheet of paper, is included.
6. All references, figures, and tables are numbered consecutively and cited in numerical order in the text.
7. All Greek letters and unusual symbols are clearly identified for the Editor and the printer.

Printed in Great Britain by Page Bros (Norwich) Ltd., Norwich

Notice from the Publisher

Contributors are earnestly requested to study the Script Requirements which appear on the inside back cover of this issue before submission of the manuscript to the Editor.

Compliance with the instructions set out there will eliminate production difficulties and greatly reduce the number of corrections to be made to proofs.
